Stage 3 – Review of the first ROWIP (2008-2018)

Introduction:

In reviewing the 1st Rights of Way Improvement Plan (ROWIP), certain factors should be taken into consideration, as not all tasks could be completed or reviewed:

- a) No ROWIP 'Template' to use: It was the first time all Local Authorities (LA) were tasked with making a ROWIP (a duty and part of the CROW Act 2000, section 60); whilst there was Statutory Guidelines from Welsh Government (WG) and the Countryside Council for Wales (CCW, now Natural Resources Wales; NRW), there was no 'template' as to how it should be done or look. There were 23 ROWIPs published in Wales and following this, the Wales ROWIP Review (March 2009) concluded that; 'every ROWIP was different' and that a 'template ROWIP document might have been helpful for ROWIP authors.'
- b) **2-year process:** The 1st ROWIP was originally written in 2006 and a draft ROWIP was published in 2007. It was then finalised, approved and adopted; the final version was published in June 2008.
- c) High number of tasks: There were 16 Key aims and priorities; within these aims, there were 63 targeted actions with 213 sub-tasks. Following a letter from WG saying that all ROWIP's were to be used to bid for additional funding, with emphasis on quantifying resources, the ROWIP was expanded (ref p5 of 1st ROWIP), which led to more tasks.
- d) Funding issues: ROWIP grant funding was made available to LAs from WG (managed by CCW), based on the % of total length of PRoW and % of population within Wales; it was not for the full 10-year period, but was provided year-on-year without guarantee. This resulted in not being able to clearly set out achievable targets. Also, many of the actions and tasks in Cardiff's 1st ROWIP were aspirational and dependent on unconfirmed grant monies. During the 10-year period of the ROWIP, grant monies were also greatly reduced year on year, which affected a number of tasks. Furthermore, whilst the total published estimated costs for all ROWIP tasks was £1,281,100 (ROWIP 2008-18, p99), the actual ROWIP grant funding over the 10-year period was £319,828 and there were supplementary grants of £274,938. There was also annual internal revenue funding (£129,702) which covered day to day maintenance and ground work and some of this was used to supplement ROWIP tasks as match funding. See financial graphs and tables at the end of this document for details.
- e) No Project Management system: There was no specific Project management tool to help issue, monitor and report on ROWIP task progress. Whilst the CAMS system was intended to manage the network and report on progress, in practice it became too costly to use and did not specifically relate to the ROWIP tasks. Towards the end of the 10-year period, the AMX system was adopted and is currently being used and updated to help in maintenance planning of the PRoW network. The LAF were updated on progress of the ROWIP and were involved in specific projects, however the ROWIP was not reviewed annually/tri-annually. The AMX system will continue to be updated and modified to suit the needs of the PRoW network, as part of the new ROWIP.
- f) **Staff changes:** Within the life of the 1st ROWIP, there were staff changes that resulted in issues of handover and continuity of ROWIP tasks and progress, so some tasks could not be commented on fully in this review.

However, despite these factors, the PRoW team achieved many of the tasks and in some instances, they excelled – especially in regard to finding and recording the anomalies on the Definitive Map (see task 1 below), also pioneering the initiative of the 'Outdoor Cardiff' brand and website.

Outdoor Cardiff: The initiative to create the **Outdoor Cardiff (OC)** brand and website was a major achievement that arose out of the 1st ROWIP process, through discussions with relevant Council teams (including Parks, Harbour Authority, Active Travel), who were consulted on the process and progress of the ROWIP. It became clear that there were many common aims and objectives within the teams, with opportunities for potential joint projects, resulting in agreement that it would be useful to have a central point to communicate to the public about all outdoor activities in Cardiff. Once content and design were agreed, the OC brand became the central point for the teams to work together on various projects and is a useful tool for the public. It is regularly reviewed to keep the site up to date.

Summary Review of 1st ROWIP – 16 Key Aims and Targeted Actions

Priority Task	Key Aims	Key highlights of Targeted Actions
1.	Definitive Map (DM): Resolve current anomalies and produce an up to date DM for Cardiff	 All draft DM maps and statements completed by Definitive Map Modification Orders (DMMO). The revised map can be viewed 'live' on <u>Cardiff Council i-share</u> We expect to re-publish the DM by end 2019. Identifying unregistered paths & lost byways; there were 23 paths claimed and confirmed under Section 53 of the Wildlife & Countryside Act 1981. Finding new paths will continue in the new ROWIP. The Supplementary Planning Guidance (SPG) was a useful tool for Developers to advise the statutory obligations of checking a potential development area for PRoWs and consulting the PRoW team. The <u>PROW Technical Guidance notes</u> (TGN) now supersedes the PRoW SPG, and is supplied by the Planning team to a Developer at Application stage.
2.	Sign-posting/ Information: Improve visibility of PROW network on the ground	 The priority routes were those deemed most popular routes in Cardiff for recreation and commuting; they were identified by our partners, also Information boards were installed in collaboration with the Countryside Team Signs from metalled roads; PRoW team are now using AMX programme, checking signage on urban paths has become part of the overall maintenance plan.
3.	Publicity & promotion: Improve awareness of PRoW	 A major achievement out of the ROWIP process, was the creation of the Outdoor Cardiff (OC) brand, website content and design, due to collaborating with internal Council partnerships (inc Harbour Authority & Parks), as a means to work together on various projects promoting all outdoor activities. Further information and content is continually being reviewed and it is a popular and useful tool for the public. Public survey; 673 completed and overview of main results given in 1st ROWIP (pages36-38) and will be compared to survey results in the new ROWIP. Other groups and organisations were consulted, incl. Community Councils, Ramblers, British Horse Society, Cardiff Cycling Campaign, Cardiff Institute for the Blind and the Cardiff Youth Forum (pages 37-40). Circulation of leaflets to local country pubs/cafes, community centres where they link to promoted routes/trails.
4.	Circular Walks: Create supplementary circular walks	 The creation of circular walks led to improved accessibility i.e. removing stiles where possible or installing steps on steep gradients and surface conditions of the existing PROW. These walks are available on <u>OC website</u> to download. Parks also have a Guided Walks and Events programme hosting activities throughout the year. Promoted routes had specially designed signage, information boards installed and leaflets to download/print to encourage more visitors to use them. People counters were also installed to see if more people were using the routes. Volunteer WfH leaders using these routes for organised walks; WfH funding is managed by Ramblers Wales wide.
5.	Wales Coast Path (WCP): Ensure participation & task completion	 There was separate grant funding for the WCP, so no key tasks were planned as part of the 1st ROWIP. However, as the WCP (opened May 2012) was featured in the 1st ROWIP and is now part of the PRoW network, overall comments were included. In 2008, a bridge was installed on Cardiff Bay Barrage linking Penarth with Cardiff Bay, which proved very popular. 2 new PRoW were created; Trowbridge 1 along the seawall (under S 26 of the Highways Act 1980) and on the west bank of the Rhymney River (under S 26 of the Highways Act, with a Dedication of land owned by Welsh Water), adding 5.1km to the PRoW network. Due to the various biodiversity protections of the Severn Estuary, Appropriate Assessments was conducted for Cardiff, then jointly with Newport and Monmouthshire Councils, to consider the impact of the path. When granted, ground works were subject to seasonal restrictions.

6.	Accessibility of PRoW: Ensure realistic & reasonable routes for disabled and impaired PRoW users	 RAFA ran until Feb 2010 and involved Cardiff Council's Equality Officer, then he established Cardiff Council Access Focus Group (CCAFG) and they are involved in consultations for the new ROWIP. It continues to be a priority to improve access for all across the path network. There are approx. 50 stiles on the roadside and 10 stiles away from the roadside to be replaced by gates, so will feature in the new ROWIP. <u>'Taff Trail Circular Walks' and 'Healthy & Scenic Walks Pack'</u> do not currently state locations of barriers, but the Taff Trail circular walks describe the route, e.g. inclines and steps. In future, as leaflets are reviewed or updated, this will be included to help inform the public to plan their routes. They are available to downloads from the <u>Outdoor Cardiff</u> site. They have not been reprinted due to costs and alternative methods of advertising and promoting the routes is being considered via mobile apps and providing printed formats in designated locations across the city.
7.	Maintenance & Enforcement: Make formal, efficient management procedures	 The AMX programme with mapping on PRoW webpage is for the public to 'Report a Problem' on any PRoW on-line. Groups including the LAF, WfH and OC have been helpful in identifying maintenance issues. More liaison with Community Councils will help to advise PRoW team about routes in their areas that need work to help maintenance planning. Enforcement letters are sent, with reference to PRoW guidance given on website.
8.	Safety: Manage perceived safety fears	 Though all the various promotions of led walks & circular walks, path use has increased. PRoW team have established relationships with most Cardiff Community Councils, as 'ears to the ground' on safely issues. New developments (e.g. LDP) should adhere to Strategic Planning Guidance to minimise risks to the public.
9.	Cycling: Extend network of cycle paths and signpost	 This involved liaising with Transport Policy Team (TPT), who created Strategic Routes that link with PROW, also linking with the Integrated Network Map and LDP to create a cohesive network. PRoW Officer attended regional meetings about the Taff Trail; the group ensured that signage & markings along the trail were the same. Sustrans now maintain signage and produce the Taff Trail leaflets. Sustrans have done an assessment of the Taff Trail along with consultation; this included shared use user conflict, then made various proposals for future implementation; this may be featured in the new ROWIP. Following approval by Parks, Motorcycle barriers were removed by TPT in the early stages of the 1st ROWIP. Parks Dept. deal with barriers in Cardiff Parks & Open spaces policy.
10.	Bridleways: Increase easily accessible routes for horse riders	 A permissive bridleway route is being created around Canada lakes (Pentyrch) to create a circular route to take horse riders off the busy roads, but has been delayed due to funding and legal agreement between the Council and landowner. Sections of the green lanes were resurfaced over the years to improve the off-road network for horse riders, but these routes need to be maintained. The main issues were lack of funding and staff resources. Signs were installed on the highway to warn drivers of horses ahead at 10 locations where PROW bridleways joined the adopted highway. The review of these signs may be one of the aims for the new ROWIP.
11.	Priority routes: Identify and manage priority routes	 As part of <u>Outdoor Cardiff</u> all partners contribute to joint promotion, which is on-going. Regular PRoW team & PRoW maintenance team meetings and attendance at other relevant meetings including LAF and Community Councils, all tasks were completed (100%). This will be an on-going, regular maintenance programme (AMX). 'People counters' were installed, but will be reviewed as to how the data is collected and managed. This will be a priority task in the new ROWIP, also to consider some to be moved to new locations.

12.	Examine the possibility of	Additional grants were sourced from partnership projects via OC; Cardiff WfH Scheme and Countryside Projects, which
	obtaining finance from additional	included initiatives via the Council's Ecologist and Parks Departments. Project funding provided by Welsh Government.
	sources	• The Council's Countryside Team formerly managed these projects, which are now part funded from the Welsh
		Government's Environment and Sustainable Development Directorate, a single revenue grant to LAs in Wales to deliver
		Ministerial priorities and multiple benefits in support of the Well-being of Future Generations (Wales) Act Goals.
13.	Shared use paths: Programme	• As part of their role, LAF (who represent a variety of user groups) actively respond to new initiatives and consultations.
	educating people to be considerate to other path users	• Note; since publication of the ROWIP in 2008, new legislation of <u>Public Space Protection Orders</u> now incorporate a clause on control of Dogs. Dog Control Orders are no longer used.
		• Continuing support and promotion of the Cardiff Code of Conduct on shared use paths, explored training opportunities
		for volunteers; e.g. assist with maintenance; Walk Leaders, etc., as promoted on OC website.
		• Signage; partially progressed with the Code of Conduct above. Further work may be one of the aims for the new ROWIP.
		 Countryside Code is available as a link on the PRoW & OC website
14.	Outsource network maintenance:	Liaised with Community Councils, community groups, Council Departments to understand where improvements on the
	is it possible to devolve responsibility	network are needed and create opportunities to work with volunteers on projects on the PROW network. This may be progressed as part of the new ROWIP.
15.	Litter on PRoW: How to deal with	'Report a problem' is publicised through the Cardiff Council website and PROW continue to liaise with Waste
	this practically	Management to report fly tipping as a reactive measure. One known hot spot is Rover Way; PRoW is working with waste
		management, various Council Officers and organisations to resolve the problem, but this is a site specific issue rather
		than a general issue across the network. The AMX system will provide a means to quantify re-occurring issues and hot spots.
		Keep Wales Tidy and Keep Cardiff Tidy tackle areas of littering in Cardiff with volunteers; this is done mostly
		independently and does not involve PRoW, however they cleared areas of WCP route before the WCP official opening.
16.	Quick wins & network surveys: To	A survey of the footpaths and identifying all furniture, types of surface and condition on paths was carried out but not
	encourage public use of PRoW.	completed. The survey provided detail of condition, type and any maintenance requirements.
	Make regular surveys	 This helped to identify where improvements were needed to improve access for all.
		 Whilst the CAMS system was used initially to record these issues, towards the end of the 1st ROWIP period, the AMX system is now being used.

Full Review of first ROWIP (2008-2018)

This Review involves looking at the 16 Key Aims outlined in Cardiff Council's 1st ROWIP, with related subsection Actions (63) & Tasks (213). This report uses Performance Indicator scores to determine the level of achievement for each action and task. This full report will be available on the PROW web page, with a hotlink on the New Assessment (Stage 4). A summary will be included in the New Assessment, draft new ROWIP (Stage 5) and final (Stage 6) new ROWIP.

Key Aim	Target Action	Task	Result / Action	Further Comments	Performance Indicator	Considered for ROWIP 2019-29
1.0	Definitiv	ve Map (DM): Resolve cu	rrent anomalies a	nd produce an up to date DM for Cardiff		
1.1	Include	previously excluded area	as/routes – <i>see als</i>	o task 1.2		
	1)	Identify PRoW in previously excluded areas (after 1 st April 1954)	* Identified 23 previously unrecorded PRoW. Of these: 10 are confirmed, 7 are in legal process (at time of publication), 6 non-eligible applications were refused. * DMMO's for all Parishes (incl. excluded areas)	 When checking the path records, anomalies were found that had not been recorded with Definitive Map Modification Orders (DMMO), so PRoW team planned to identify what the anomalies were and confirm all Parish DMMO in order to republish the new Definitive Map (DM) by 2019; this would be the first time since the original maps were published in 1954, which would show the number of changes made to the network over the years. The anomalies included the Parishes of Cyncoed, Llanishen, Llanrumney, Llandaff and Roath. Using Section 53 of Wildlife & Countryside Act 1981, with Section 31 Highways Act 1980, the public may claim paths used 'as of right' for 20 years or more of uninterrupted use; PRoW team researched paths claimed by public and if they were eligible, made legal order PRoWs. Applications refused were normally on the grounds that they were not eligible, e.g. for personal use and not for the public at large. This project helped identify and add relevant lost ways for Cardiff ahead of 1st Jan 2026 deadline; after this, unrecorded lost ways will not be allowed to be recorded on the DM. NB: This deadline is specifically about recording lost ways; other paths may still be added. 	100%	
	2)	Add paths to map base (1:10,000), write definitive statements	* Paths added to map base * Statements for all Parishes done	 Added anomalies and new paths as identified in 1) above to map base. Mapping was done to scale 1:10,000, in order to show better path alignment details. Worked with ICT to ensure path alignment was correct. Completed definitive statements for all Parishes. 	100%	

	3)	Digitise map base to	Produced online	 Digitised anomalies and added new paths identified in 1) above to map base. 	100%	
	4)	1:10,000 Transfer 3) to 1:25,000 & print	version of DM Produced print version of DM	 Map layers added to Cardiff Council's i-Share GIS and MapInfo. Transferred digitised scale 1:10,000 to legally required DM scale of 1:25,000. Downloadable mapping is accessible to the public (i-share) either as pdf or screen shot. It has not been printed. 	80%	
	5)	Legal process to formerly create DM	Created, awaiting PINS to confirm	 Legalised anomalies and new paths identified in 1) above. DMMO details added to map on scale 1:25,000 as required for OS mapping. Created, awaiting Planning Inspectorate (PINS) to confirm in order to publish. 	80%	
:	All draft PINS. PII revised r	DM maps and statements are NS will then investigate before map 'live' now on <u>Cardiff Coun</u>	completed by DMMOs full confirmation of all <u>cil i-share</u> . See also Ma	for Cardiff is as up to date as possible. (including translation to Welsh); awaiting legal process for a Section 53 (W&CA 1981) application, DMMOs can be made. Following this, we will be able to publish a printed version publicly, howeve ap 1 and 4 on New Assessment. r we expect to re-publish the DM by end of 2019.		
1.2	Exami	ine the current Glamorga	n DM – to be done	in the same way as the Cardiff DM; reference with all tasks in 1.1		
1.3	Consc Whilst th There ar	blidate Definitive map with his was recorded on the 1 st RO ¹ re 400 pages of linen maps, wh	h excluded areas a NIP as a targeted action ich were available for p	DM was considered at the same time (4 tasks x 100%). and Glamorgan map – reference with tasks 1.1 & 1.2 above Action 1.3 – Concluding remarks: n, it was effectively covered in the work done within Action 1.1 & 1.2 (3 tasks; 2 x 100%, 1 x 80%). public viewing in the former offices at Brindley Road. They have now all been scanned and the origing the work done electronic pdfs of various historic maps dating back to 1		protected
1.4	_	ing work to identify unreg	vistered paths for	uture inclusion on DM		
1.4	_	ing work to identify unrea Via LAF & various groups, seek more routes	gistered paths for f On-going work, will feature in the new ROWIP	 This is aimed at finding lost byways, new paths and popular routes used 'as of right' but not legally recorded PRoW, in order to consider future inclusion on DM, prior to 2026 cut-off date (see 1.1). Lost Byways were not progressed due to lack of funds for compensation of landowners and staff resources. Several members of the public have applied under Section 53 of the Wildlife & Countryside Act 1981, due to their use of paths 'as of right'; see 1.1), point 2 	60%	

1.5	Emplo	ying a dedicated DM Office	r. <i>NOTE: Not ac</i> l	hieved, due to no funding available from CCW (now NRW)				
•	streams a However	available or identified (2 tasks, x C , as delivering revisions to the DN	%). 1 are statutory, one	Action 1.5 – Concluding remarks: that there would not be any grant funding available for this post from CCW (now NRW) and there we of the original PRoW team dealt with DM issues as part of their role. Currently this officer is no lor	nger dealing s	-		
	DM issue	es, so the PRoW team now deal w	ith them, which has	resulted in a lengthier process. This has inevitably caused a knock-on effect with other ROWIP tas	ks.			
1.6	PRoW Supplementary Planning Guidance (SPG) clauses. NOTE: This was published in Oct 2006; the LDP Technical guidance notes (TGN) now supersedes this							
	1)	SPG to be placed on Outdoor Cardiff (OC) website	Put on PRoW landing page	 The Supplementary Planning Guidance (SPG) provided guidance to Housing Developers, Land Owners and others whose land developments were likely to affect PRoWs in the area, to assist them to understand why they must consider PRoW as a statutory obligation. Developers now consult PRoW team when proposing land developments. The SPG was put on Cardiff Council PRoW web pages, because it gave Planners specific strategic information and provided a link with other departments. OC is a portal to help people find information about outdoor activities; it was not relevant to Planners so SPG was not put on the OC website. 	100%			
	2)	SPG to be available in Brindley Rd offices	Completed	 Whilst originally available in Brindley Rd offices, when these offices closed in 2012, the SPG was made available to view in County Hall from Planning Dept. and PROW Team. 	100%			
	3)	SPG to be referenced on correspondence to Planners	Completed	 PRoW guide established. LDP Guidance notes now supersedes SPG. 	100%			
:	The LDP still need PRoW pa See Map	points T1, T8 & K16 (ref <u>Green Inf</u> I to consider PRoWs. This would n iths, but not necessarily paths use 4 on New Assessment for referen	rastructure SPG, wh ormally be supplied d 'as of right'. Ice to paths created	Action 1.6 – Concluding remarks: bry obligations of checking a potential development area for PRoWs and consulting the PRoW team hich refers to the <u>PROW Technical Guidance notes</u> (TGN) now supersedes the PRoW SPG, however d by the Planning team to a Developer at Application stage. Points to note include:

- The LAF greatly assisted the CAO in finding a viable route, which had to be submitted to CCW by Nov 2007.
- The first major project in 2008, was to install a bridge link on the Cardiff Bay Barrage, to allow people to walk to and from Penarth and Cardiff Bay. The people counters recorded 160,000 users in the first 12 months, with overall visitors to the Barrage increasing by similar numbers.
- 2 new PRoW were created; Trowbridge 1 along the seawall (under Section 26 of the Highways Act 1980) and Splott 1 along the west bank of the Rumney River (under Section 26 of the Highways Act, with a Dedication of land owned by Welsh Water), adding 5.1km to the PRoW network.
- The WCP in Cardiff is approx. 15 km/9.3 miles and is part of the South Wales Coast and Severn Estuary region. The WCP from North to SE Wales is approx. 1,400km/870 miles.
- Grant monies for Cardiff totalled £421,629 up to the end of the project in 2013 and £29,077 to March 2018
- Due to the various biodiversity protections of the Severn Estuary, there was a need to conduct Appropriate Assessments for Cardiff, also jointly with Newport and Monmouthshire Councils, to consider the impact of the path. Following this, ground works were subject to seasonal restrictions.
- Due to restrictions within ABP ports, part of the route has to go inland, however this also enables access to café's, shops, accommodation, etc.
- People counters were installed and monitored at 5 points along the route.
- The WCP was officially opened on 5th May 2012, with 3 National openings including one in Cardiff.

6.0 Accessibility of PRoW: Ensure realistic & reasonable routes for disabled and impaired PRoW users

6.1 Establish the Rural Access for All (RAFA) Focus Group and identify key tasks to be undertaken

1)	Identify people who have an investment in these matters	Completed, but RAFA group disbanded by	 Those with an interest in path accessibility were approached and the Rural Access For All (RAFA) group was established in June 2006, to help with the ROWIP process. 	80%	~
2)	Establish future tasks and define group responsibilities	Feb 2010 Substantially Completed	 This was completed as one of the 1st ROWIP Officer's projects, who managed the group along with group member Dr Rob Gravelle (Equalities). The group ran until Feb 2010. 	80%	✓
3)	Identify a series of tasks that could be done	Completed	 A series of site visit consultations were conducted including; Taff Circular Walks (with route description), Ely Trail, Hailey Park Code of Conduct Project & Healthy and Scenic Walks. 	100%	
4)	Identify funding sources	Started	 This was originally funded by ROWIP grant (additional funding was not sourced). 	20%	\checkmark
5)	Undertake tasks as funding allows	Substantially Completed	 The RAFA group carried out assessments on identified trails. 	80%	\checkmark
6)	RAFA to review, then identify future tasks	Started	 The RAFA group disbanded in Feb 2010. 	40%	\checkmark

Action 6.1 – Concluding remarks:

RAFA ran until Feb 2010 and involved Cardiff Council's Equality Officer.

The Cardiff Council Access Focus Group (CCAFG) was established by the Equality Officer and whilst this group considers accessible issues, PRoW were not featured. However, they have agreed to be involved in consultations for the new ROWIP and there are 2 members involved in the new ROWIP Sub-Group for more direct input.

6.2	Empha	sis on policy to replace st	les with gates or	gaps		
	1)	Publicise on OC & other relevant publications	On-going	 A number of stiles were identified to be considered for removal to leave a gap, or replacement with gates where stock control is still required. 	40%	\checkmark
				 See 6.1 5), re. RAFA members' assistance. 		
				 This work has not been publicised on OC, however PROW Team has worked closely with 		
				Community Councils, organisations and liaising with members of public to identify where		
				improvements should be considered.		

			-			
	2)	Implement replacement of stiles to the widest extent of the network	Substantially completed	 Stile removal was at the discretion of Lead Officer where they were deemed dangerous and areas where there is agreement with the landowner. On average, 6-8 stiles are replaced by kissing gates annually as part of the winter maintenance programme. Approximately five new self-closing gates were installed across the network on bridleways or where there is no risk of stock escaping onto a road. 2 x 2-in-1 gates were installed to retain vehicle access for the landowner with pedestrian access. 	80%	
				Action 6.2 – Concluding remarks:		
•		inues to be a priority to improve '				
•	There are	e approximately 50 stiles adjacent	to the roadside ar	nd 10 stiles away from the roadside that have been identified that should be replaced with gates.		
	Make			disability of impairment to use the PRoW network	1	
	1)	Look at 'best practice' by	Completed	 Attended a National Training course on Access & interpretation on paths, along with other 	100%	
		other LA similar packs		LA to assist in planning for least restrictive access issues.		
	2)	Present RAFA with examples, consider strengths &	Completed	 This was done in conjunction with creating circular walks (Priority Task 4). This was a partnership project with Countryside Team, Parks, WfH and RAFA. 	100%	
	2)	weaknesses			4000/	
	3)	With RAFA members, agree content for Cardiff's pack	Completed	 2 packs were created; <u>'Taff Trail Circular Walks' and 'Healthy & Scenic Walks Pack'</u>. The packs provided information including 10 Reasons to Walk and Access for All. The information provided key information about the surface conditions, any barriers (steps, gates), along with information about facilities and parking. 	100%	
	4)	With Comms team, determine feasibility of producing packs	Completed	 Done via OC partners Packs designed & produced by the Countryside team 	100%	
	5)	Using OC brand, produce the pack	Completed	 The Taff Trail pack was created so that each individual walk led into the next card. This meant that a short health walk could link to two or more cards to create a longer walk, depending on the individual's ability. They give text information about furniture (inc steps, gates) and points of interest. 	100%	
	6)	With OC, ensure packs are distributed	Completed	 The packs were distributed along with all the other leaflets as part of Task 3. Hard copies of these packs are located in TIC and Bute Park Education Centre. 	100%	
				Action 6.3 – Concluding remarks:	•	
•	on reque	st.		approx. 100 packs distributed per year. At present, packs are distributed to the public or community	/ centres/tou	rism off
	Use de		people to dete	ermine suitability of route for themselves (see 6.3)	1	
	1)	Look at 'best practice' by other LAs using similar wording	Completed	 Done at the same time as 6.3.1) 	100%	
	2)	Present RAFA & OC with these examples	Completed	 Done as part of 6.3.2) 	100%	
	3)	With RAFA & OC, determine best way to describe PRoW conditions. Initially apply to 'priority routes'	Completed	 The information provided on the leaflets allows the individual to determine the suitability rather than by labelling a route as easy/medium/difficult. See 6.3.3). Issue: The information on promoted circular routes only provides general information such as the terrain, distance, facilities, parking. 	80%	v

	4)	With Comms team, ensure information is made widely available and on the OC website	Completed	 The walks are all hosted on OC website. With the website redesign, some leaflets still need to be uploaded onto the website. 	40%	√
•	The variou leaflets ar map for the The leafle the route	ks were largely covered in Action us walk leaflets and website do no re reviewed or updated, this infor he network and this will be consic ets have recently been amended a s is being considered via mobile a	ot currently all stat mation should be dered as a potentia and are available of pps and providing	n the <u>Outdoor Cardiff</u> site. They have not been reprinted due to costs and alternative methods of a printed formats in designated locations across the city.	ouncil's i-share	online
7.0				ient management procedures		
7.1	1)	late implementation of mai Identify route categories of PRoW hierarchy	ntenance & en Completed	 forcement strategy Created and publicised 'Report a Problem' online via Highways Asset Management Expert (AMX) portal; this shows where there are re-occurring issues & assesses priority of routes. Each PROW path is prioritised by a cutting regime and the level of maintenance required to keep the path open and accessible for users. This includes signage issues. Categorising a path as 'low priority' may not mean it is not well used, but it may require little maintenance. Further categories will be added to AMX maintenance programme. 	100%	
	2)	Investigate obtaining the Countryside Access Management System (CAMS) mapping system	Completed	 The CAMS System (used by most LA) was installed and used on a daily basis for 1st ROWIP, however the AMX programme is now being used (see 1) above), which is not compatible with CAMS, so PRoW mapping had to be merged with the AMX programme. Also, CAMS was costly to run and was only used by PRoW team; other team colleagues could not use it. 	100%	
	3)	Develop proposed maintenance strategy in line with Asset Management principles	On-going	 Currently PRoW Team are surveying all paths for the AMX programme. Regular inspections made to control outbreaks of Invasive Weeds (e.g. Japanese Knotweed, Himalayan Balsam) and where identified, weeds treated annually by a contractor. This will be on-going as a statutory task. 	80%	~
	4)	Implement the policy	On-going	 PRoW Maintenance Team record daily work undertaken. 	80%	\checkmark
	5)	Continue consultation with OC & other user groups	On-going	 PRoW team liaised with Community Councils to determine if the priority routes are what they see as priority, or if there were any changes required. Historically, PRoW team cut back & maintain paths on their understanding of where issues are, or if the public report/request action. There may be others that need to be included. Action 7.1 – Concluding remarks: 	80%	✓

The original use of the CAMS system was useful to the PRoW team in order to log, monitor and plan maintenance, however it was not helpful to the public in reporting issues. The use of the AMX programme has resolved this so the public can now 'Report a Problem' with any PRoW on-line and PRoW team now use AMX mapping.

Groups such as the LAF, Walking for Health and OC contacts have been helpful in determining key maintenance issues, however further liaison with Community Councils will be able to
advise PRoW team with any known priority routes in their areas that need attention, which will assist in maintenance planning.

10.2	Investi	gate possibility of using 'gre	een lanes' for h	orse-riding purposes		
	1)	Identify location of all green lanes	Incomplete	• The green lanes are registered as adopted highway and are old drover's roads which are rutted and overgrown. Some lanes are more accessible than others, however, if access is improved, these routes will create an off-road bridleway network which is needed due to the increase in developments in the rural areas of Pentyrch, Creigiau and Radyr.	20%	√
	2)	Identify landowners, initiate negotiations	Incomplete	 Landowners have been identified in certain sections, however negotiation or compensation is not required as the lanes are already adopted and by reclassifying them from adopted highway to a bridleway or restricted by-way, will only inhibit motorised vehicular access. 	20%	\checkmark
	3)	Initiate legal process to create 4 bridleways	Incomplete	 The use of volunteers to open up the access on the green lanes has been undertaken initially. The legal process to create the bridleways has not been started but is still considered a priority. 	20%	\checkmark
	4)	Design & produce promotional material	Incomplete	 This will be completed once the routes are open and accessible. 	0%	\checkmark
•	were lack Reclassific	of funding and staff to source add cation of the green lanes to becon	ditional resources. ne Bridleways/Res	stricted Byways and surface improvements for accessibility will remain a key aim in the new ROWIP.		ssues

15.0	Litter o	Litter on PRoW: How to deal with this practically – See also Task 7.1 and 14										
15.1	Initiate 'inspection system' within newly formulated maintenance & enforcement strategy – see Actions 7 and 14											
:	Action 15.1 – Concluding remarks: Report a problem is publicised through the Cardiff Council website and PROW continue to liaise with Waste Management to report fly tipping as a reactive measure, however, this is not currently analysed to determine frequencies or identify hot spots. One known hot spot is Rover Way; PRoW is working with waste management, various Council Officers and organisations to resolve the problem, but this is a site specific issue rather than a general issue across the network. It should be noted that Keep Wales Tidy and Keep Cardiff Tidy tackle areas of littering in Cardiff with volunteers, though this is done mostly independently and does not involve PRoW. They have worked with the WCP Officer on clearing areas of path ahead of the official opening of the WCP. The AMX maintenance system will provide a means to quantify re-occurring issues and hot spots (linked with Task 7.1). Additional work with community groups (see Task 14) to arrange litter-picking days will be considered in the new ROWIP (Action; overall 5 tasks x 80%)											
15.2	Use specific signage to encourage responsible behaviour, including disposal of litter – see also Priority Task 2 and 13.2											
•	Action 15.2 – Concluding remarks: The Countryside Code of Conduct is promoted on information boards on site and trail leaflets to encourage responsible behaviour, which includes taking your litter home. One of the biggest problems of litter is dog fouling; a series of signs are posted on gates and stiles to remind path users to pick up after their dogs and take their litter home. This task was not progressed further than stated above, however, it may be one of the aims for the new ROWIP (Action; overall 60%). 											
15.3	Initiate relationship of co-operation with Sustrans & BTCV – see Task 4.1											
	1)	Initiate co-operation with Sustrans via Cycling team & Cycling Officer	Completed and on-going	 On average, between 3 to 5 days per year work days were undertaken by Sustrans Volunteers to help litter pick and cut back vegetation along the Taff and Ely Trails. Sustrans usually contact PRoW to check that they have permission to carry out maintenance on a section of trail they have been made aware of, which requires vegetation clearance. 	100%	~						
	2)	Initiate co-operation with BTCV via Communities First & 'project specific' meets	Completed and on-going	 BTCV have carried out a variety of installations on the PROW network, such as, installation of bridges and boardwalks and repaired revetments where the path edges were eroding on steep embankments. BTCV funding changed and the group disbanded. However, Cardiff Conservation Volunteers (CCV) formed as a constituted group and then assisted PROW with path improvements and vegetation clearance. On average, BTCV and CCV carried out tasks between 3 to 5 times per year, depending on availability of PRoW funding; PRoW pays for and supplies path materials required (i.e. stone, waymarker posts, boardwalk kits, etc.) and a daily rate to cover volunteers' travel expenses. 	100%	 ✓ 						
•	PRoW tean	n works closely with Sustra	ns and CCV (see Actio	Action 15.3 – Concluding remarks: on 4.1) on a regular basis for volunteering days. This may be one of the aims for the new ROWIP.								
15.4	Design	dedicated Schools Pro	gramme, to prom	ote social consciousness and provide environmental information – see Action 13.5	5							
•	Action 15.4 – Concluding remarks: This action was not progressed (see Action 13.5) (5 tasks x 0%). 											

16.1	Initiate measure to make overall survey every 3 years – see Task 7.1 2)								
	1)	Investigate obtaining the Countryside Access Management System (CAMS) mapping system (used by most LAs)	Completed	 The CAMS System was installed and used on a daily basis within 1st ROWIP, however as the AMX programme is now being used (see Task 7.1 2), which is not compatible with CAMS, the PRoW mapping had to be merged with the AMX programme. PRoW now use AMX mapping. 	100%				
	2)	Liaise with ICT to obtain funding for CAMS	Completed	 CAMS was supported by ICT and PRoW budget was allocated to install and support the programme. 	100%				
	3)	Use CAMS to make 'on the ground' survey of the condition of the network	Substantially completed	 A survey of the footpaths and identifying all furniture on paths was carried out but not completed. The survey provided detail of condition, type and any maintenance requirements. This helped to identify where improvements were needed to improve access for all. 	80%	V			
	4)	Review maintenance schedule based on survey feedback	Incomplete	 Due to PRoW team restructuring, the remaining officers did not have experience to use CAMS and costs for training were too expensive to continue using the system (see 7.1). Not progressed but currently working on setting up AMX to review maintenance programme and BVPIs. 	20%	V			

schedule and identify areas of need to improve access for all. This is also a management tool to help plan future maintenance (see 7).

Summary conclusion of tasks actions:

There were 16 Key aims, 63 targeted actions and of these, there were 213 tasks.

Of the 213 tasks;

- 69 were completed
- 37 were substantially completed
- 20 were partially completed
- 13 are at planning stage
- 27 tasks were initiated
- 47 were not started

Some tasks will be included in the new ROWIP, however some tasks may be abandoned if the public decides that they are not needed, or other tasks may have higher priority.

NOTES/Appendix:

A. Outdoor Cardiff:

When planning the ROWIP, the PROW team worked with Parks, Countryside, Cycling Officer (Transport) & Harbour Authority, so there was substantial crossover interest activities and projects. As a result, Outdoor Cardiff brand and website was created to incorporate all teams, which is now used to promote 'Outdoor' activities. This was a major outcome of planning the ROWIP and strengthened collaborative working between Council Depts.

B. Partners (incorporating Council Depts):

- i. Countryside Team, including Biodiversity (part of Planning Dept.); they managed various WG grants (managed by CCW/NRW) including Countryside Grant.
- ii. Parks
- iii. Cardiff Harbour Authority
- iv. Transportation (Cycling) Also:
- v. Natural Resources Wales (formerly Forestry Commission)

C. Boundary changes:

Following the Local Government (Wales) Act 1994, some of the county boundaries changed:

- i. Mid Glamorgan (a preserved county) was abolished in 1996; Pentyrch (from Taff-Ely district) was added into Cardiff Council's county area.
- ii. South Glamorgan (a preserved county) was abolished in 1996; Pentyrch, Gwaelod-y-Garth & Creigiau (from Taff-Ely district) became part of Cardiff Council's county area.

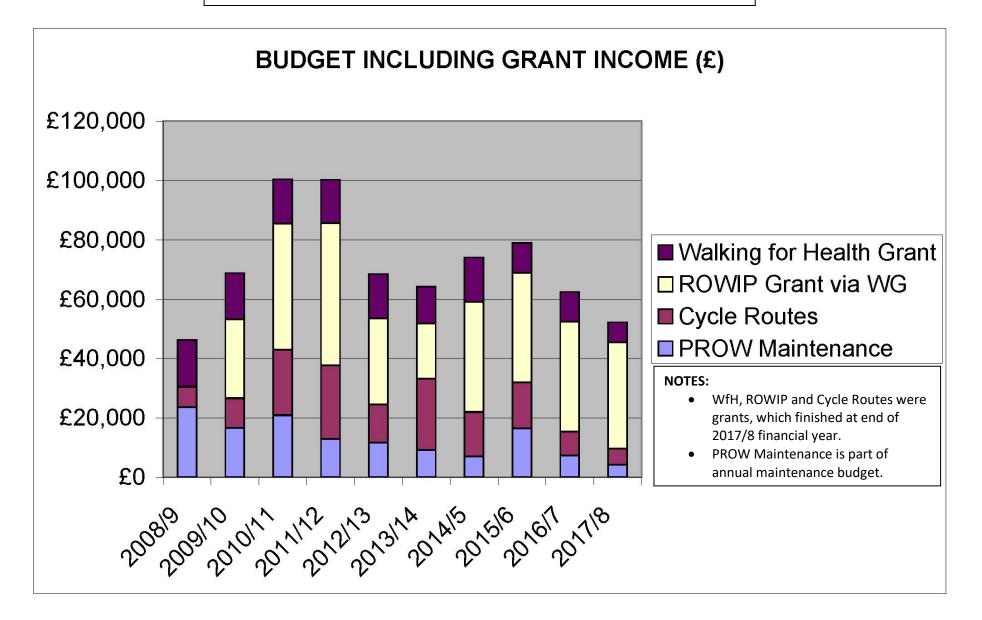

Also:

iii. Monmouth(shire); the historic boundary between Glamorgan and the county of Monmouth (now Monmouthshire), was the Rhymney River.
 Rumney was historically part of Monmouthshire, but in 1938 was incorporated into the county borough of Cardiff under the Cardiff Extension Act 1937. St Mellons and Old St Mellons were historically in Monmouthshire, but in 1974 became part of South Glamorgan under the Local Government Act 1972 (see ii.).

D. Excluded areas:

Due to the historical rapid growth of the city and county of Cardiff, certain urbanised areas were excluded from the DM, as PRoW were absorbed into developments as pavements, lanes, etc. (historical maps would show these changes in more detail).

Notes on Budgets and Staff:

- Volunteers; hours were not recorded and are unknown. On average; volunteers participate in organised activities on PROW between 3-5 days per year. Most of this has been managed in partnership with Parks, Cardiff Conservation Volunteers, Sustrans and localised horse riding groups.
- Staff, re full time equivalent (FTE); this represents the number of working hours that one full-time employee completes during a fixed time period, such as one month or one year. This is used to convert the hours worked by part-time staff into the hours worked by full-time staff for comparison purposes over the same fixed time period. For example; an officer works for 2,080 hours in a full working year (excluding all holidays), equal to 1 FTE. If an officer works 1,040 hours in a full working year, equal to 0.5 FTE; this could be 1 officer working full time for only half of the working year, or a part time officer working half of a working week throughout the whole working year. The graph shows the equivalent result for comparative and statistical purposes.
- During the 10-year period, there were several staff changes, including staff leaving from higher/mid graded posts and staff joining on mid/lower graded posts. There was also a period where staff were able to leave on voluntary severance (VS), with subsequent VS payments.
- Officer time on grant funded projects included payment of most of salary, which was match funded by Cardiff Council; this included on-costs for hosting the officer.
- WCP (See Key aim 5); budget spend not included on Graph 1, as there were no tasks in the ROWIP. The WCP was officially opened in June 2012 and the project Officer finished in June 2013. Following this, the WCP budget was minimal.
- Grant funding, projects for investment; usually Welsh Government (WG), managed by Natural Resources Wales (NRW formerly Countryside Council for Wales (CCW), also other organisations.
- Re WfH and ROWIP: From 2013 to financial year end 2015, the full time Officer post was shared between 2 projects (WFH + ROWIP), then in 2015-17, due to reduced funding, the post became part-time.
